**Weather Advisory Notes:**

The weather advisory is based on the Indian Meteorological Department's (IMD) prediction for the upcoming 15 days. The advisory provides information on the expected weather conditions, including temperature, humidity, wind speed, and precipitation. The advisory is updated daily to provide farmers and the general public with accurate weather information for planning and decision-making.

**Weather Advisory Details:**

The advisory details the expected weather conditions for the next 15 days, with specific emphasis on the current forecast period. The advisory includes temperature ranges, humidity levels, wind speed, and precipitation estimates. The information is provided to help farmers plan their agricultural activities, such as crop cultivation and harvesting.

**Weather Advisory Tips:**

1. Farmers are advised to take necessary precautions based on the weather conditions forecasted in the advisory.
2. The advisory emphasizes the importance of timely crop management based on the predicted weather.
3. The advisory provides guidelines for preventing crop damage due to adverse weather conditions.
